We know a thing or two about keyboards...

This brochure only tells 1% of the story.

**ACCURATUS**

# Ceratech •

Ceratech was established in 1982 as UK agents for one of America's largest keyboard manufacturers, KeyTronic. Things quickly progressed and today Ceratech boasts one of the largest, most diverse ranges of keyboards in the UK.

It would have been easy for Ceratech to develop into a broad line distributor but as history has proved, many IT distributors have flourished and failed under the vagaries of our industry. Back in 1982 Ceratech made the right decision to specialise this gives us the right to say "know your business then stick to it".

In the early 90's, Ceratech established its own brand, ACCURATUS which is Latin for With Care Precise Accurate.

Ceratech, in its long history has provided 'OEM' solutions to many of today's top IT manufacturers. We have touched nearly every retailer along the way and continue to work with the UK's leading IT Distributors. We manufacture for many of the leading PC brands whilst servicing the needs of dealers throughout Europe.

As we head towards our 30 millionth sale, our diverse catalogue and ever expanding website can never display the full wealth of products and knowledge gained within this industry.

Just because you haven't seen it doesn't mean we haven't got it.

# Full Layout Keyboards

At the core of Ceratech's range are the Full Layout Keyboards. Products you expect to find in a busy office, on the shelves of a local retailer or packed as standard equipment with a new PC.

Research has shown that 70% of any product evaluation is made through touch and feel. Of course, word of mouth or personal recommendations play a strong part and of course, price is often a pre-requisite, however, it is not until the product is in the hands of the user does the true quality reveal itself.

With this in mind the importance of a good quality peripheral becomes clear. Ceratech's Full Layout Keyboards hit a comfortable balance between price, performance and enduring good looks.

## 260 Hub

Accuratus 260 Professional Keyboard with 2 Port USB2.0 Hub & One Touch Euro Key

The patented Accuratus 260 is the only keyboard with a specific Euro currency key. Inputting the Euro symbol for many users is difficult and time consuming. This problem is immediately solved with the 260's dedicated one touch € key. The 260 Euro Hub has also two USB 2.0 ports giving you extra connectivity right at your finger tips. The keys are extremely durable and provide excellent feedback.

## 201

Accuratus 201 Slim Standard Keyboard

The Accuratus 201 from Ceratech is a full size 105 keyboard but with some of the 'fat' removed. Using 'edge to edge' keys the 201 is ideal where a full size keyboard is required but where space is limited. As with many other Accuratus keyboards it uses ultra reliable membrane technology and hard wearing keys which ensures the characters remain fresh throughout the products life.

Full Layout Keyboards

# Mice

Did you know that the computer mouse is the most handled product in the world, well ahead of mobile phones, personal stereos and perhaps knives and forks.

With such a plague of mice on the market it's difficult to know what to choose. Ceratech have narrowed down the definitive selection from laser to entry level ball mice. Each one has been tested in the hands of real consumers and not just selected from an arbitrary list.

The aim of a good mouse is to forget it, if you can't then it's either inaccurate or uncomfortable.

## 1310

Accuratus 1310 Optical Mouse

You can't want for much more - perfection in silver. Finding the right mouse is never easy but the 1310 has the answer. This beautifully designed and engineered mouse is one of the best mice on the market. With its 3 button mechanism and centrally mounted scroll wheel, the 1310 mouse makes light work of the day ahead. Fast, sleek, accurate & reliable are hallmarks of this fine product.

## IMAGE

Accuratus Image Mouse with Illuminated Scroll Wheel

Image is all important in the mouse business, just as feel and accuracy play a major part. The Image mouse from Accuratus blends subtle gloss colours, style and precision into a mouse you can use on a daily basis. It's low profile one piece button assembly gives the product an almost perfect balance.

# Non-Corruptible USB Memory

For many years Ceratech have been providing both miniature MP3 players as well as USB memory sticks.

From this range comes a variety of USB devices which offer serious advantages over regular products.

Take for example the Triple Boot drives which allow you to power up a PC into it's operating system, or the Ultra Stable drives which cannot be damaged if removed while the PC is transferring files to it. Great innovation in little boxes.

## U220

U285 USB Zip & USB HDD Bootable USB Memory with Security Protection

Like a cheap pair of shoes, not all memory products are the same. The most important part about a Flash Drive is YOUR DATA. Scrimping on the price is like holding a damp stick of dynamite - buy it once, buy it right. The U285 incorporates patented "Non-Corruptible Technology" which prevents the data on the drive from being corrupted. With USB Zip and USB Hard Disk Booting the U220 has a multitude of plus points over its competitors.
